Les gets an ego booster

Greenie and Jeanie — testing ... one, two

What time does Lassie come on?

We have six minutes to finish the book.

There are obviously three colony types growing here.

... batteries not included ...

He's been like this ever since the last exam

This worm is the symbol of our profession?

Not your ordinary housecat

Me next!

You mean no more bon-bons!

X-zone ! What a way to start out the morning .

Would you care to repeat that suggestion?

I just don't see how 70% of the class missed that one.

The object of the play is to protect your quarterback — me!

OK — Let me explain it one more time ...

Does right well on three legs

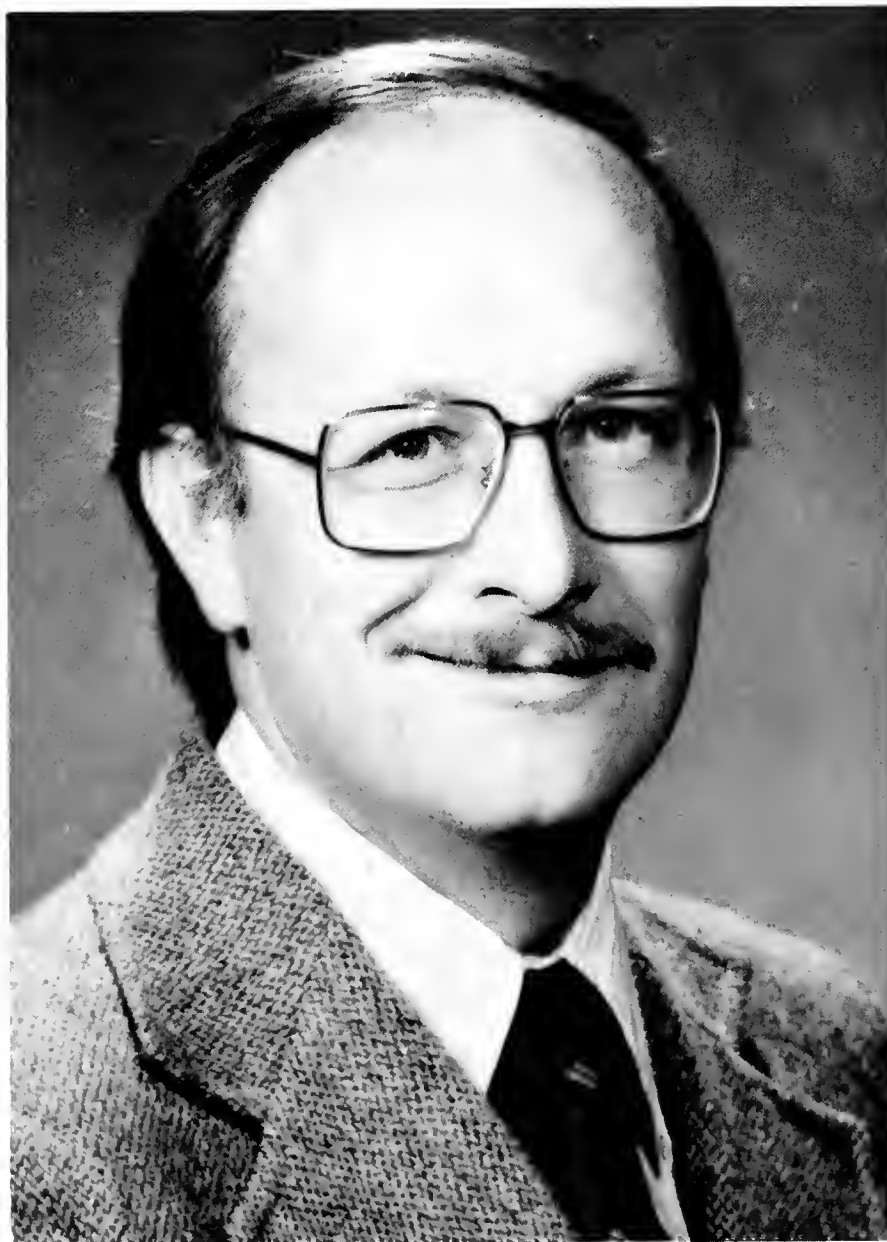

Veni, Vedi, Vici!

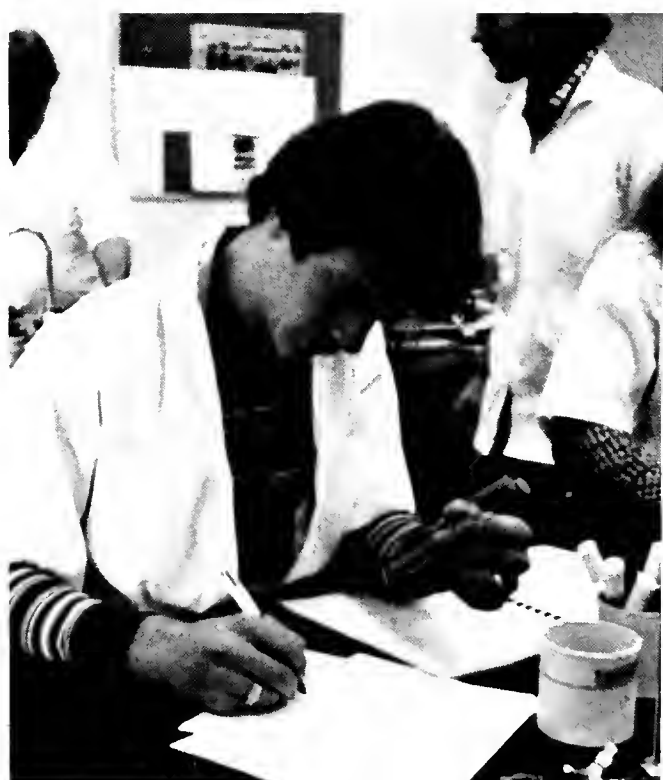

The 1979 Veterinarius
Is Dedicated In Memory Of
Dr. Christopher Wetherbee

During our short passage through veterinary school we chance to meet many exceptional people. The class of 1979 is proud to dedicate this year's Veterinarius to the memory of one such person. Dr. Chris Wetherbee graduated in 1978, and, before leaving UGA to establish a practice in Vermont, had a strong influence on all that knew him well. Chris was dedicated to learning and to his profession. This was evidenced by his tremendous energy and hard work, combined with the patience and character that are such important ingredients in the making of a successful person. Despite the time consuming nature of vet school, Chris diverted much of his time and energy to his wife Julie and daughter Kathryn Elizabeth. His love and devotion to them was an important part of Chris's life.

As we think of our own lives, we sometimes focus too sharply on our ultimate goal of obtaining a DVM, and forget that the most valuable moments of our lives are the ones we are living right now. We will always be saddened by the loss of a friend and colleague, especially when he is young and has so much potential, but this loss has taught us the importance of living for today as much as for tomorrow. The Veterinarius describes our daily lives in vet school, just as it did when Chris was a student, and the Class of 1979 wishes this dedication to be a tribute to him.

"Jereboam Blue and his son Lillboy live in South Georgia where they survive by various shady deals (selling moldy sweet potatoes to dairy farms; aflatoxin-contaminated corn to chicken farms; high-nitrate hay to competitor beef breeders, etc.) They also make moonshine, which Lillboy loads in his souped-up 64 Chevy and carries to sheriff (cousin) Sky for sale in Sky's illicit gambling nightclub. These boys raise the finest Polled Redneck Cattle in the South. They also raise a few sheep. The fences on the farm are in poor shape and there's a dump in the middle of the cornfield. One day, the sheep got in the meadow and the cows in the corn, and Lillboy Blue came and blew his horn. He told you that some of the cows were dead and others were sick." You jump into your 4-wheel drive Mercedes pick-up (with jacked-up rear end, mags, etc.) and ride out to the farm. The cows exhibited bright red mucous membranes, colic, and you notice alot of the above plants growing in the sparse pasture. What is your diagnosis?

Grandma, the ageless Guernsey cow, passed away in March of this year. Reflecting upon how many classes of students have palpated her, cast her, and taken exams off her, it is clear that Grandma taught more students than any faculty member here. In addition, Grandma defied all predictions of bovine life expectancy. She was thought to be in her twenties when she was donated to the College in the 1950's; this surely qualifies her as ageless. In keeping with this belief, the anatomy department has saved her bones and will reconstruct Grandma so that she will have received "tenure" at U. Ga. College of Veterinary Medicine.

Intravet

G.V.E.S.S.

For those of us who wonder each quarter just what is G.V.E.S.S. it stands for Georgia Veterinary Educational Supply Service, Inc. and we have S.C.A.V.M.A., Carol Moon, and Jeff Head to thank for its efficiency and reliability. We are indeed lucky to have our own Veterinary Bookstore since most vet students have to go through their University bookstore for their texts; and we all know the tremendous bills incurred there not to mention the hassles of the beginning of the quarter rush. Our bookstore provides special orders, up to date information on required and suggested texts, minimal prices, and a book-buy-back and used book service. Thank-you Carol, Jeff, and S.C.A.V.M.A.!

American Association Of Bovine Practitioners

This year Georgia's student chapter of A.A.B.P. had eleven speakers on many different topics ranging from beef cattle nutrition to judging dairy cattle. This organization served to bring many of the students who like cattle together, and allowed us to share ideas, listen to interesting speakers, and most of all, to learn. All in all, it was a good year.

Mona Gitter — Vice Pres.; Dave Pugh
— Pres.; Janet Brown — Sec. - Treas.

American Association Of Equine Practitioners

The student chapter of Equine Practitioners is a new organization formed by students from all classes interested in expanding their experience in equine medicine and surgery. Activities included speakers, a "colic team", and assisting at trail rides and combined training events.

Enthusiasm was strong in our first year and we look forward to an even better one next year.

Dr. Charles Reid, Univ. of Pennsylvania

Jon Foreman — Pres. elect; Allison McNally — Vice Pres.; Brenda Payne — Sec. — Treas.; Scott Fubini — President

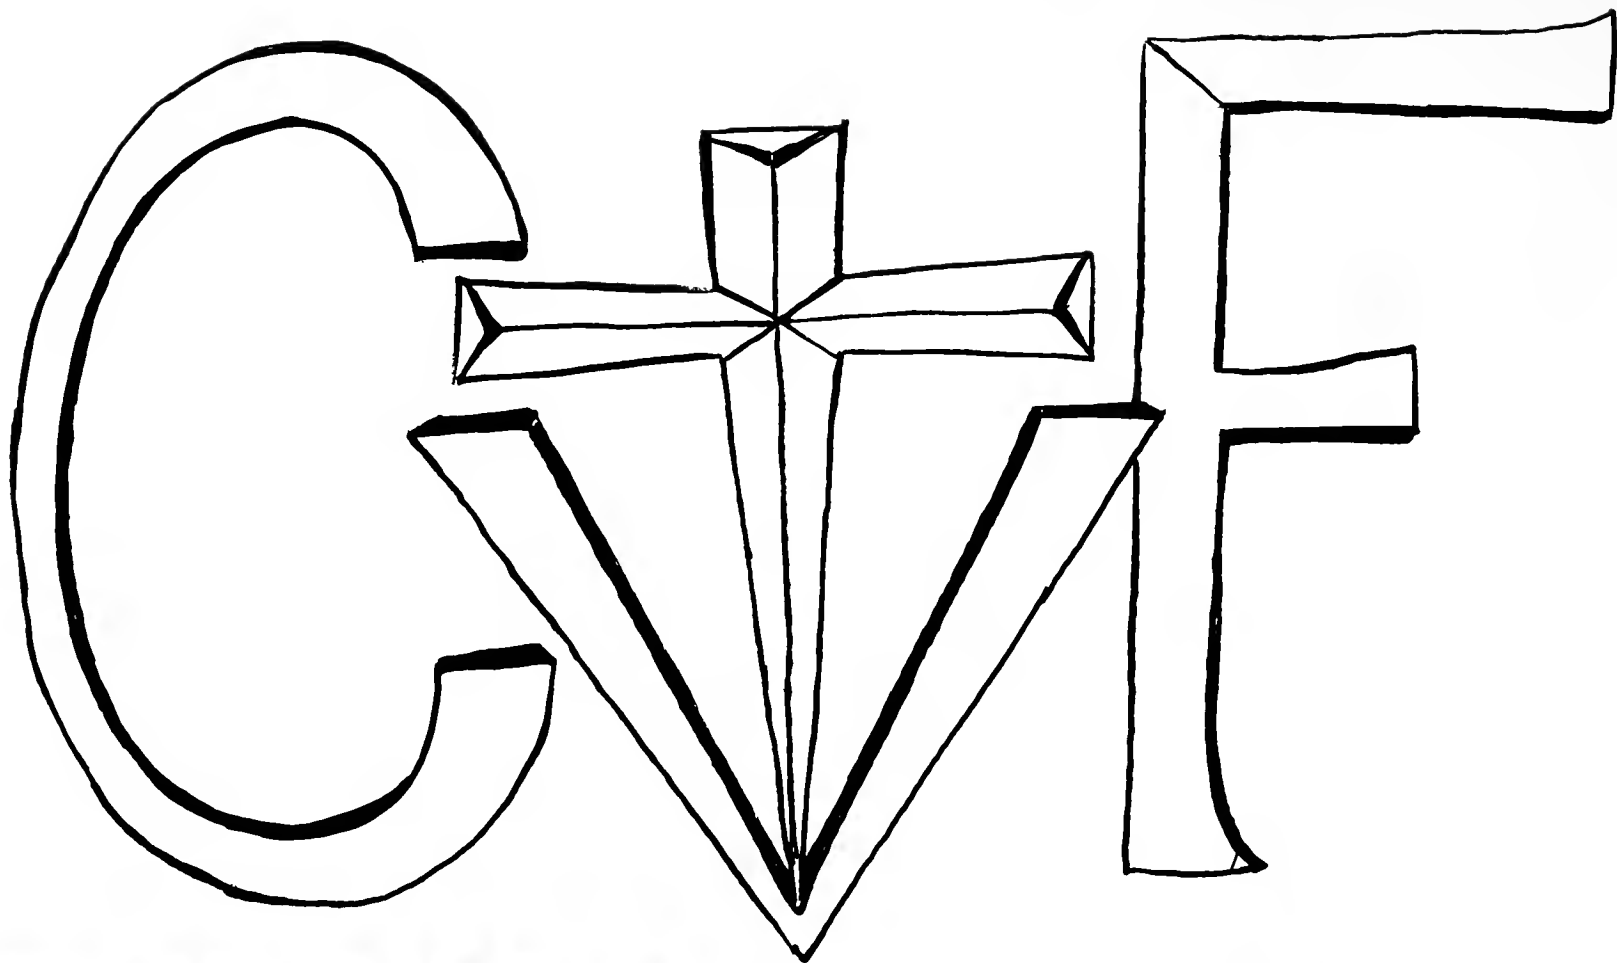

Richardson, Vice President; A
 on Sec. - T
 Preside

The American Association of Zoo Veterinarians approved student chapters in the fall of 1975 and in January of 1976 the University of Georgia student chapter was founded. Since that time several papers have been presented to the chapter and a presentation on proper rehabilitation was given at the annual open house. There are plans to adopt an animal at the Atlanta Zoo. Next year is looking for equipment for our organization and we hope to be doing more to increase the educational facilities for our animal which live here at the University of Georgia.

American Association Of Zoo Veterinarians

O Lord, thou hast searched me, and known me.
 Thou knowest my downsitting and mine uprising, thou
 understandest my thought afar off.
 Thou compassest my path and my lying down, and art
 acquainted with all my ways.
 For there is not a word in my tongue, but, lo, O lord,
 thou knowest it altogether.
 Thou hast beset me behind and before, and laid
 thine hand upon me.
 Such knowledge is too wonderful for me; it is high,
 I cannot attain unto it.
 Whither shall I go from thy spirit? or whither shall I
 flee from thy presence?
 If I ascend up into heaven, thou art there: if I
 make my bed in hell, behold, thou art there.
 If I take the wings of the morning, and dwell in the
 uttermost parts of the sea;
 Even there shall thy hand lead me, and thy right hand
 shall hold me.
 If I say, surely the darkness shall cover me; even the
 night shall be light about me.
 Yea, the darkness hideth not from thee; but the night
 shineth as the day: the darkness and the light
 are both alike to thee.
 For thou hast possessed my reins: thou hast covered me
 in my mother's womb.
 I will praise thee; for I am fearfully and wonderfully made:
 Marvellous are thy works; and that my soul knoweth right well.
 My substance was not hid from thee, when I was
 made in secret, and curiously wrought in
 the lowest parts of the earth.
 Thine eyes did see my substance, yet being imperfect; and in thy
 book all my members were written, which in countinuanee were
 fashioned, when as yet there was none of them.
 How precious also are they thoughts unto me, O God!
 how great is the sum of them!
 If I shall count them, they are more in number than the sand:
 when I awake, I am still with thee.
 Search me, O God, and know my heart: try me, and know my thoughts:
 And see if there be any wicked way in me, and lead
 me in the way everlasting

From Psalm 139

Women's Veterinary Medical Association

This past year has been a busy one for WVMA. Starting with our annual ice cream party at freshman orientation, we got a chance to meet our new colleagues of the class of '82.

Our major money-making project every year consists of making and selling note and Christmas cards designed by fellow classmates. It was a bumper crop this year as everyone seemed to go hog wild over the red cards that had the pigs on them. We anticipate an encore next year of this favored design.

Four guest speakers filled this year's agenda: Private practitioners gave generously of their time and experience to talk about operating practices, Federal Government career opportunities were discussed, and a bank loan officer elaborated on the realities of establishing credit as a new graduate.

Our emphasis has shifted more toward bringing to the student body information on the practical aspects of our profession — the kind of information not found in our medicine texts — that will help make our transistion into the real world a smooth one. WVMA has something to offer for everybody and we welcome your participation.

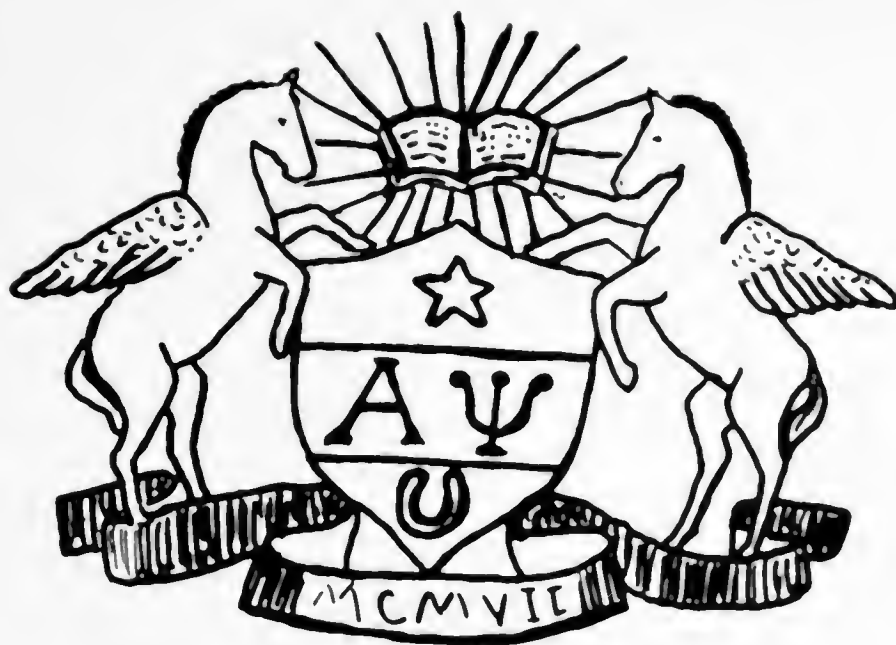

Pam Ellison, Sec. - Treas.; Gail Donner — President; Debby Dzimianski — V. Pres.

Dr. Phyllis Sparling, Vet. Medical Officer (guest speaker)

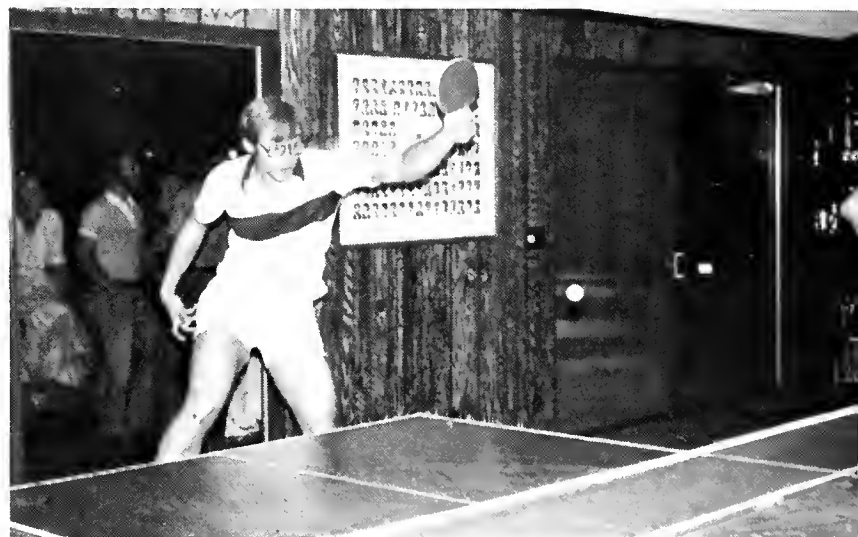

Bill Cook and Harry Cunningham — Sgt.-at-arms; Mike Heinen and Bill Bolecek — Social Chairmen (Fourth row) Greg McLeod — House Mgr.; Dave Marshall and Rick Henshaw — Historians; Mike Younkers — Corresponding Secretary (third row) Tony Puglesi and Dave Pugh — Rush Chairman; Hal Mauldin — Alumni Secretary; Dale Heisler — Treasurer-elect (second row) Lamance Joyce — President; Grant Nisson — Vice President; Don Keifer — Treasurer; Luke Lipham — Recording Secretary (first row)

The fall of 1978 began as the brothers of Alpha Psi got the house ready for Rush 1978, led by La Mance Joyce and Sam McFaddin. It was, to say the least, a great success as one of the largest pledge classes ever was welcomed. Weekends were highlighted with Friday afternoon kegs and Saturday afternoon Georgia football, with a fine Homecoming Dance. Alpha Psi Sports, led and "inspired" by David Pugh, began the quest for the All Sports Trophy (for the second year in a row), as the mighty Psi placed first in football, volleyball, tennis and others. Winter quarter came with the coldest of weather. Some of the South Georgia boys saw a record amount of snow and the Psi still kept the All Sports Trophy by placing first in snowball battles. Hal Mauldin defended and claimed his title of Best Beard at the Hobo Ball and many lovely young ladies were escorted to the Sweetheart Dance on Valentines Day. A Little Sisters program was begun this year and has proven to be a great success. They are already a nice addition to the fraternity. Also, the Alpha Psi Auxillary has been very busy with projects to improve the house and are much appreciated.

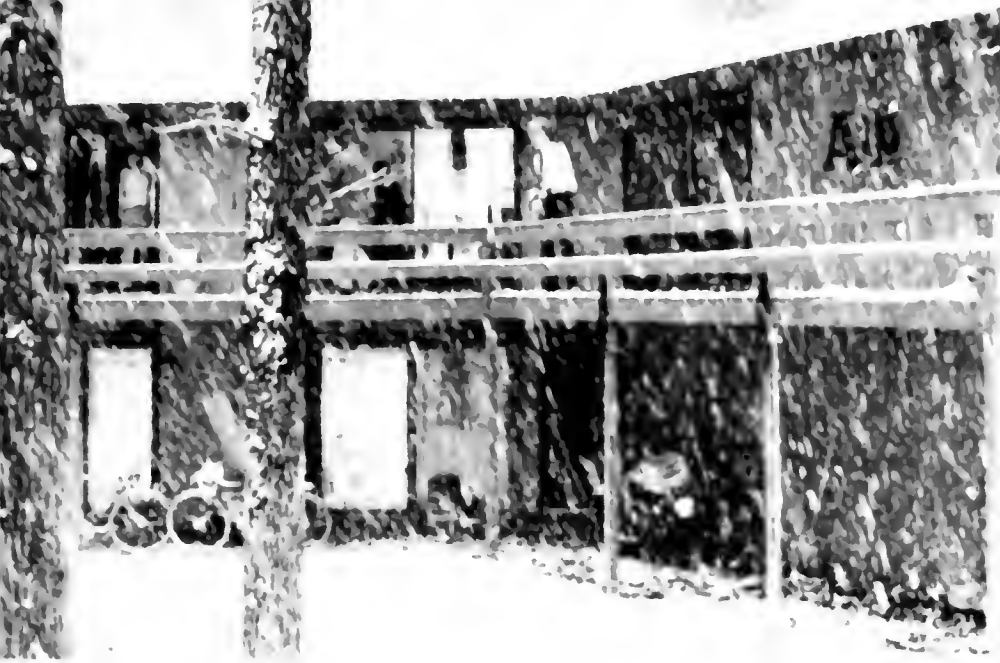

At last Spring quarter came with shouts from the seniors and sighs from the freshmen (relief-anatomy was finished). Friday kegs took on a new light when the sun came out and many activities were planned for the quarter. Placebo Ball was very successful, as Dr. Lester Crawford was honored as Veterinarian of the Year with the A.M. Mills award. Many alumni were in attendance and a great time was had by all. Other highlights of the quarter were the Oyster Supper, Rodeo and Senior Roast.

La Mance Joyce took over as new President of Alpha Psi as Rob Griffeth stepped down from office. One of the purposes of the fraternity is to provide a social retreat from the drudgery of classes. At the Alpha Psi house and among the brothers at school, this purpose is more than fulfilled. Many memories are gathered that will not soon be forgotten.

Veterinarius Staff

Staff Members of the Veterinarius have all worked hard to produce an annual for our fellow students which will hopefully stir vivid memories in all of us from the year 1979. Many thanks to those who contributed hours of work and also to all our photographic subjects. We owe special thank to Dr. Munnell, John Weldon, and Terry Brian for their assistance and the use of darkroom facilities.

Let there be Economical Light!!

Economy plus quality?
Burton has done it.

Our new Burton Economy Floor Stand Reflector Light has put it all together.

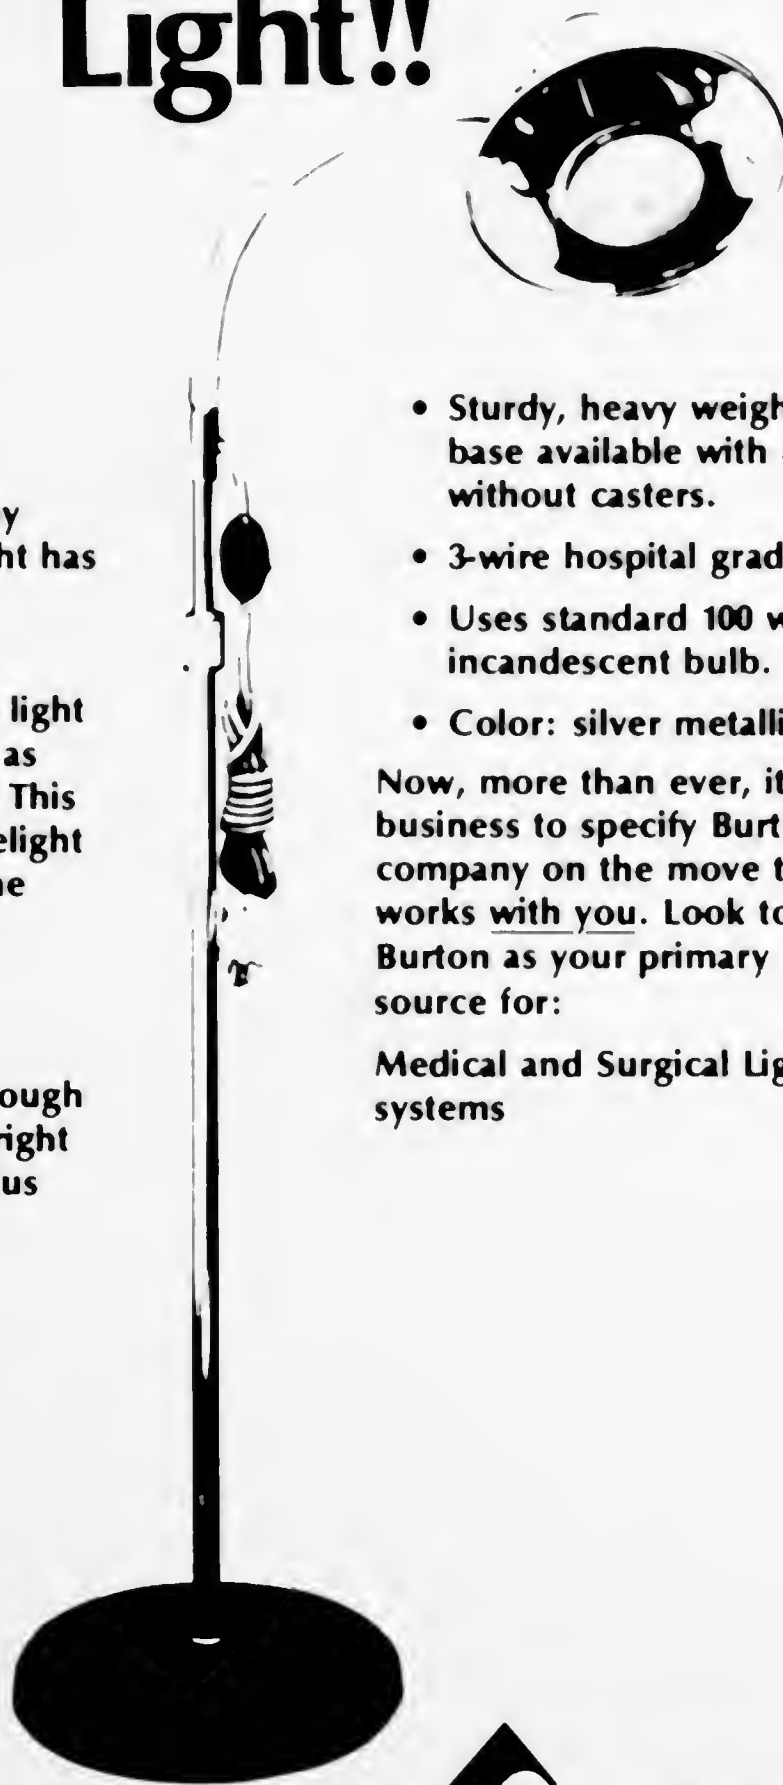

Features include:

- Color corrected cool light using the same filter as large reflector lights. This provides 2,000 candlelight output at 27" from the viewed object.
- Full 10" ALZAK® processed reflector.
- Dual adjustability through both a telescopic upright with locking collar plus gooseneck arm.

- Sturdy, heavy weighted base available with & without casters.
- 3-wire hospital grade plug.
- Uses standard 100 watt incandescent bulb.
- Color: silver metallic.

Now, more than ever, it's good business to specify Burton, the company on the move that works with you. Look to Burton as your primary source for:

VANGUARD™

Now... a virus discovery so significant it creates an entirely new generation of vaccines!

Here's the first major breakthrough in canine hepatitis immunization since the first vaccines were introduced more than 25 years ago.

Norden's Vanguard utilizes an exclusive canine adenovirus type-2 isolate. In conferring immunity against basic adenovirus type-1 (hepatitis) infections, Vanguard also provides proven protection against adenovirus type-2 (respiratory) infections. These are characterized by pneumonia, tonsillitis, pharyngitis, bronchitis... as well as causing lung lesions and being a factor in kennel cough.

Hand in hand with this cross-protection, Norden Vanguard achieves a new level of safety. For example, post-vaccination incidence of "blue eye" is sometimes associated with adenovirus type-1 hepatitis vaccines. No Vanguard vaccine-related "blue eye" was found in tests involving more than 19,000 dogs. Even when 172 dogs were deliberately inoculated intravenously with vaccine virus, there was no sign of ocular lesions in any of the animals.

The Vanguard virus is non-oncogenic as demonstrated in comprehensive two-year tests by Norden researchers. The protocol for these tests was reviewed by the National Institutes of Health, and the results of these extensive tests were accepted by the

USDA. Other Norden tests showed the Vanguard virus did not produce kidney lesions, nor was there any evidence of shedding or reversion to virulence.

Vanguard is available now from your Norden branch as a replacement for our former Enduracell line.

TOMORROW **will be better.**

Because you are working today. Your training, insights, and skills are producing an increasingly healthy animal world. And we're working side by side with you to provide the products to match your talent. Problems are becoming more complex and more difficult to solve. But together we're doing it.

For example, at Burns-Biotec, our scientists discovered that when they combined Selenium and Tocopherol, both essential nutrients and antioxidants, they produced a synergistic effect. It not only permitted a marked reduction in each for the desired effect, but increased their biochemical and clinical effectiveness. Selenium/Tocopherol is a proven agent for maintaining normal health and growth and for activity in inflammatory disorders, on the

immune system, in protein synthesis and for control of certain metabolic degenerative diseases.

So, we're getting it done. We share days that are long and hard. It takes a lot of energy, knowledge and dedication to reach sundown. And it often doesn't end there. Why? We'd like to think it's because we're responsible.

And we care.

When people are depending on you...

As a veterinarian, your clients will be coming to you for a very special service . . . the protection of their pets' health.

To keep their trust, you'll want your practice to provide only the most dependable products . . . like TASK[®] (dichlorvos) Dog Anthelmintic, TASK[®] TABS (dichlorvos) Anthelmintic for Cats and Puppies, Flea Collars for Cats and Dogs, EQUIGARD[®] (dichlorvos) Equine Anthelmintic, and EQUIGEL[™] (dichlorvos) Specific Spectrum Equine Anthelmintic. These are the kind of products a practice is made of.

SHELL CHEMICAL COMPANY,
Veterinary Products, One Shell Plaza,

Paramite™...the new dip that controls fleas and ticks on dogs and cats.

Also controls Sarcoptic Mange on dogs.

Paramite is a dual purpose dip. It gives 16 day residual control of fleas and Brown Dog Ticks on dogs; 9 day residual control of fleas on cats, and a 16 day residual control of ticks on cats. And it also gives control of sarcoptic mange on dogs with one dip treatment.

Paramite is economical and practical to use as a sponge-on or dip. Mix only 1 ounce

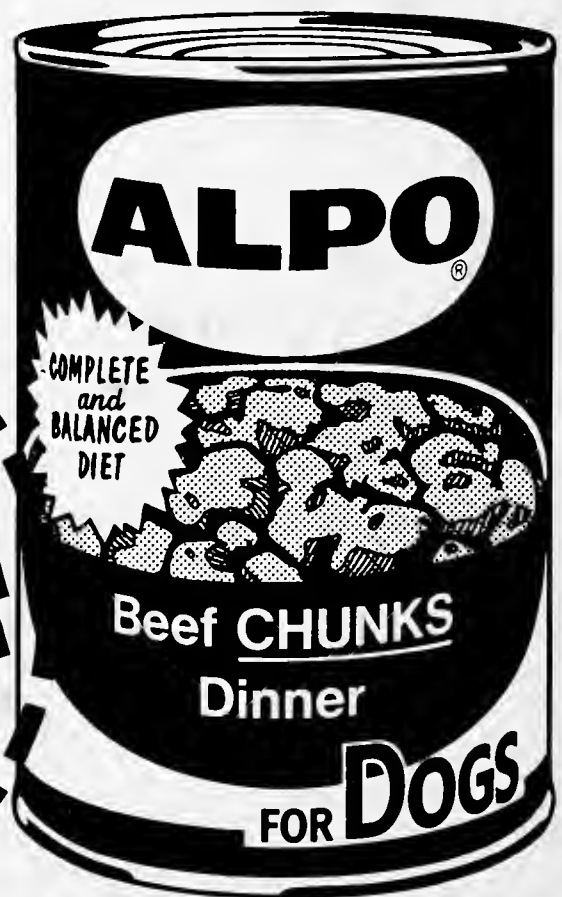

per gallon of water for dogs and 1/2 ounce per gallon of water for cats. And the solution can be stored or used for 30 days after preparation.

Available in 4 ounce, 16 ounce, 1 gallon and 5 gallon containers.

**When you add
a little of this,
you add a
lot of**

**REAL
BEEF**

You've got a kennelful of meat-lovers. And there's nothing more likely to make them grateful than adding some ALPO to their dry.

ALPO Beef Chunks Dinner gives them what most other dog foods don't. Lots of real beef, plus hearty meat by-products. Soy for better balance. And vitamins and minerals to complement the nutrition of your present feed. You can also serve it as a complete ration straight from the can. Either way, don't champions like yours deserve at least a little ALPO?
